

FIRST OFFICERS OF FRESHMAN CLASS CHOSEN WEDNESDAY

Norman L. McClintock of Reading Chosen to Lead Class of 1929

P. H. GILL VICE-PRESIDENT

McClintock a Cross-Country Man—Was Winner of Freshman Meet

Norman L. McClintock of Reading, Massachusetts, was elected president of the class of 1929 at the freshman election, held in the main lobby on Wednesday. McClintock is captain of the freshman cross country team at the Institute, and last Wednesday he won the three mile cross country race of the New England Intercollegiate Freshmen, leading the field at the tape by 220 yards. He is a graduate of Reading High School, where he was a three letter man. He did not, however, come out for track until he came to the Institute.

Paul H. Gill of Belmont, Massachusetts, received the position of Vice-President. He is the son of Professor Augustus H. Gill '84 of the Chemistry Department and prepared at Chauncy Hall, where he was president of the student council. He is a candidate for the fencing team.

Lewis R. Aldrich of Billings, Montana, was chosen as secretary of the class and Gerald Palmer of Atlantic City, New Jersey, was elected as treasurer. Palmer is a member of the Banjo Club.

Other elections are: to the Executive Committee, Frederic A. Celler of Lyon, France, and Allen R. Congdon of Nashua, New Hampshire; and to the Institute Committee, Donald R. Funk of Glenside, Pennsylvania, who played tackle on the freshman field-day football team, and William W. Young, Jr., of Coatesville, Pennsylvania.

Combined Clubs Hold Smoker In Walker Thursday

Over sixty members attended the smoker of the Musical Clubs held last evening in Walker. In order to acquaint the men with one another tags were given out on which the men wrote their names.

An address was given by W. P. Lowell '26, general manager of the society; and Louis J. O'Malley entertained with professional sleight-of-hand tricks. Lowell announced at this time that there would be a winter concert. The members were also entertained by a banjo duet given by R. Mancha '26 and D. A. Shepard '26 and a trombone solo given by W. H. Borghesani '26.

Refreshments were served in the form of cider and doughnuts.

Next Tuesday evening the club is to broadcast a concert through WBZ. Before the broadcast which is to be relayed from the Hotel Brunswick, O. B. Dennison '11 will address the broadcasting members.

Announcement of the eliminations of candidates will be posted next Monday.

YALE GAME WILL BE HEARD PLAY-BY-PLAY

Special receiving equipment has been constructed by members of the radio society which will be installed in the first floor lounge of Walker Memorial to receive the play-by-play results of the Yale-Harvard game as they will be broadcast tomorrow from Soldiers Field.

Graham MacNamee of Station WEAU, who has announced returns of both the last national political conventions, will give the returns of the game as it is played. The receiving set which will be installed for the game is a neodyne tuner with a special three stage resistance coupled power amplifier which has been built with special care for tone quality reproduction.

CHEMICALS INSPECT SHAW CANDY PLANT

Manufacture Followed From Roasting to the Final Product

Thirty members of the Chemical Society were shown through the Page and Shaw Candy Company factory yesterday. The men went through in groups of ten in order that a better opportunity might be had to view the different processes.

Among the processes observed were the manufacture of the chocolate and the making of the various fillings. The manufacture of chocolate was followed through from the roasting and cooking to the final product. The candy is dipped entirely by hand. All boxes and packages are made in the factory.

A double interest was attached to the trip due to the fact that the men were allowed to eat all the candy they wished.

COMMITTEE ON SONG BOOK TO BE CHOSEN

Institute Committee Acts On Question of Technology Song Collection

At the regular meeting of the Institute Committee yesterday afternoon the motion was carried that the president D. H. Shepard '26, appoint a Committee to investigate the advisability of revising, publishing and fostering a Technology Song Book. This committee will be appointed soon.

The Walker Memorial committee made the announcement that engagements of North Hall would have to be cancelled or postponed for the present week in order that the painters might have an uninterrupted opportunity to finish the work which has been started there. It was further announced that the anteroom on the second floor in the north-east corner of Walker had been secured for use as a ladies retiring room in connection with dances held in North Hall.

The motion was made that a committee be appointed which should be known as the World Court Committee for the purpose of securing speakers and arousing student interest in this respect. This motion was not passed however.

The names of members not present at yesterday's meeting are: W. P. Berkley '27, A. B. Brand '26, R. L. Cory '26, and F. E. Walsh '26.

MECHANICAL SOCIETY TO HOLD ELECTIONS

Owing to the loss of its President, the Mechanical Engineering Society is to hold an election for a new chairman, as well as the customary election for a Sophomore assistant.

The resignation of Kenneth E. Hill, the former chairman, due to the press of other work, leaves the chair vacant. Elections for both will be held on next Wednesday in room 3-460. All men in Course II may vote. The nominees are: Chairman, Francis A. J. Brown '26; Sophomore Assistant, Walter B. Dean '28, Richard L. Spofford '28.

Fire in S. A. E. Fraternity House Believed Hoax By Sleeping Men

Early Wednesday morning the members of Sigma Alpha Epsilon, asleep in their house at 484 Beacon street, were roused by firemen, and told to get down stairs. Believing it all a hoax, they told the well-meaning but bothersome fire-fighters to stop playing tricks on them at such an ungodly hour. "Get the Hell out o' here, your whole damned house is on fire!" was the reply of the disturbing smoke-eaters. The smell of smoke, by this time noticeable in the big dormitory on the fifth floor of the house convinced the men that something was burning in earnest.

As they descended, they were alarmed to find the whole front of the fourth floor ablaze, hoses being dragged up the stairs, and everything thick with smoke. Told that the fire would soon be under control, the men stayed in the lower floors of the

ANNOUNCE COURSE IN GAGING TO BE GIVEN NEXT TERM

Earle Buckingham Appointed To Teach Precision Measurement

WIENER GOES TO EUROPE

Next term, courses in precision gaging will be added to the work on production methods recently introduced by the Department of Mechanical Engineering. President S. W. Stratton stated after announcing the appointment of Earle Buckingham, to the staff of the department.

Mr. Buckingham comes from the Pratt and Whitney Company of Hartford where he has been in charge of the design of gages and other precision apparatus. He is a leader in several of the American Society of Mechanical Engineers standardization committees and has presented two papers to meetings of that organization so far this year. Before accepting a position with the Pratt and Whitney Company at the close of the war, Mr. Buckingham served in the Ordnance Department of the Army.

Modern manufacturing methods are based upon the complete interchangeability of parts, and this interchangeability depends upon gaging which not only involves standards of measurement but methods of applying these standards in actual practice. According to President Stratton, "Mr. Buckingham is an authority in standardization, gaging and inspection practice."

Dr. Norbert Wiener, professor of Mathematics, has been invited to lecture at the Universities of Copenhagen and Goettingen. The Executive Committee of the Corporation granted him a leave of absence from April, 1926, to February, 1927, in order to permit him to accept.

ELECTRICAL SOCIETY STATES NEW POLICY

Speakers to Be Chosen to Help Each Man Choose His Niche

"It is a tremendously bigger problem for the college man to find the right job within the industry he enters, than to select the industry." The above statement, quoted from E. B. Roberts, of the Westinghouse Company, in Tech Engineering News, is the basis of a new policy regarding the selection of speakers for the Electrical Engineering Society meetings.

In an effort to correct this situation and give members somewhat of an understanding of the qualifications and view points necessary in different departments of the electrical industry, men are to be secured who have become prominent in purely engineering and in administrative lines. These speakers, representing the electrical manufacturing, telephone and power industries, will tell the kind of men they want in their respective departments of industry. They will also speak of the possibilities and problems in connection with taking on increased responsibility and increased authority, after such positions have been secured.

TOTAL OF \$2512.12 RAISED INT. C. A. DRIVE--AMOUNT SLIGHTLY OVER QUOTA SET

REPAIRS STARTED IN NORTH HALL

Ceiling, Walls and Woodwork Are to Be Renovated With \$700 Fund

Redecoration of North Hall of Walker has now been started as a result of the action of the Corporation in approving the Institute Committee's request. The plans which have been drawn up are expected to make the hall popular for medium sized dances and other affairs.

The sum of \$700 has been authorized to be spent on the repairs. Of this amount \$200 will be paid for resurfacing the floor. The floor is the only wooden one available at the Institute for dances, so that the refinishing is planned to make it desirable as a place for dances. The repainting of the walls and ceiling which is now being done will cost \$300, and the remainder will be spent for new draperies. Professor H. W. Gardner '94 submitted the color scheme which will be followed.

According to H. W. Jones '26, chairman of the Walker Memorial Committee, the committee aims to popularize North Hall. This will tend to make Walker nearer to what it is intended, a center for undergraduate activities. The redecoration of the Faculty Dining Room is to be undertaken during the Christmas vacation. Jones stated that North Hall and the dining room could be used together for student functions. He pointed out that it would be convenient to use the smaller room for refreshments if the other were being used for dancing.

Entrance to North Hall is made through the trophy room and Faculty reading room and across the balcony.

FILM ON DYNAMITE TO BE SHOWN TODAY

The Manufacture of Dynamite will be the subject of the motion picture to be shown by the Organic Division of the Department of Chemistry at four o'clock this afternoon. Inasmuch as the picture is six reels long, there will be no extra time available, and all students desiring to attend are urged to appear on time.

The film was procured from the DuPont Company, and illustrates in detail the various processes used in the manufacture of this explosive. The program this afternoon is one of the series being run by the department in co-ordination with the lectures in Organic Chemistry. Plans for the next pictures are undecided at present.

MANY ARE EXPECTED AT DANCE TONIGHT

Tonight, the annual fall dance of the Technology Catholic Club will take place in the main hall of Walker. Music will be furnished by "Dok" Eisenbourg and his Sinfonians.

This will be an informal dance, and everyone is invited. Many other colleges will be represented and many of the alumni are expected to be present. The Dance Committee headed by Hector Moineau '27 has made elaborate preparations for the affair.

MORE THAN HALF OF STUDENT BODY HAS CONTRIBUTED

Out of 2800 Men, 1810 or 64.6% Have Given or Pledged Money

AVERAGE PER MAN IS \$1.39

A total of \$2512.12 was contributed in the T. C. A. charity drive, which ended last night at about six o'clock. The number of students contributing was 1810 out of a total of 2800 registered; that is 64.6 per cent. The average contribution of each man was \$1.39. Of the total \$1838.42 was in cash, and \$673.66 in pledges. The original quota was \$2500.00.

A higher percentage of the freshman class contributed than of any other; the lowest percentage of contributors was shown by the Graduates. Of the 33 fraternities at the Institute 29 contributed 100 per cent.

Course IX won the honors among the courses, 90 per cent of its enrolled members contributing to the drive. Next in order came Course VII with 80 per cent and Course II with 72.5 per cent.

Three dormitories—Crafts, Nichols, and Holman—contributed 100 per cent. In '93 dorm, 97 per cent gave to the fund; 91 per cent of Runkle's enrollment contributed; and Ware and Atkinson gave 83 and 84 per cent respectively.

About one-half of the total raised was given by men in the dormitories and fraternities. There were 124 men soliciting contributions.

The progress of the drive was followed day by day by charts in the Main Lobby, showing the standings of Classes, Fraternities, Courses, and Dormitories.

T. C. A. MAKES FIRST DEPUTATION VISITS

Allston Congregational Church received the first deputation team visit of the T. C. A. Sunday, November 15, when W. M. Ross, C. C. Shotts, J. H. Wills '26, A. D. Calhoun '27, F. E. Stevens '27 and R. S. Chidsey '26, took charge of the Sunday services at that church. The sermon was delivered by Ross, Shotts and Chidsey on the subject "Christianity from the Standpoints of Service, Friendship and Living."

A two man deputation, consisting of C. C. Shotts and C. A. Harrison '26, visited the Young People's Society of the Winchester Congregational Church the same day at 6:00 o'clock. The subject covered was "Practical Christianity."

LIBRARY EXHIBITION DIFFICULTY ARISES

Due to a last minute difficulty arising concerning the exhibiting in the library of a copy of the Taj-Mahal, the model will not be put on display for a few days yet. Preparation for its proper effect has been completed and as soon as the library officials and the owner B. J. Gupta '27 settle this unexpected hindrance, the students will have the privilege of seeing a miniature specimen of one of the Seven Wonders of the World.

CALENDAR

Friday, November 20
3:30—Sophomore football picture. Notman's.
5:00—Chem. Soc. officers meeting. Room 3-312.
8:00—Catholic Club Dance, Main Hall, Walker.
8:00—Dorm dance, recreation room, Carr Fastener Co.
Saturday, November 21
3:30—Tech Show chorus rehearsal, East Lounge, Walker.
Tuesday, November 24
7:45—Mining Soc. Smoker, West Lounge.

STUDENT ASSEMBLIES

IT HAS come to be generally recognized that Technology is in a transition stage. In the past, the predominating characteristic has been the technical training. This is a perfectly natural condition arising from the fact that the majority of the men do not live on the campus. Whatever claim we have had to a college life of any nature, owes its existence to the fostering which it has received from the activities and fraternities. Every year sees new steps made in the direction of a unified Technology. Naturally the hope of the sustaining of this ideal hinges around the condition when there will be dormitories for all, and fraternity houses on the campus. Nevertheless it lies within our power to accelerate the oncoming of this new era. The most practicable plan which presents itself now is that of having regular student assemblies. The student assembly is one of the best ways of fostering that college spirit which we so much desire. The student assembly is not a hypothetical solution to the situation, but is something which in other places has stood the test of time. Let us take for example the case of our sister school, Rensselaer. For many years now there have been student assemblies held there. These assemblies have taken the form of pep meetings with prominent speakers or entertainers to assist. At these meetings are made the announcements which are of importance to the college body. The college songs are sung, the cheers given, and awards of letters made. These assemblies enable the men to get acquainted with those who are representing the college in all the branches of activities. The result has been one of inestimable value to Rensselaer in every way in the matter of promoting college spirit. Is it not reasonable to suppose that it would benefit us in a like manner? There are several difficulties which at once present themselves. Yet these difficulties should not prove insuperable. Let us consider the first which is that of a place to meet. Main Hall, Walker Memorial, is the most promising place which appears at first thought. It should be possible to accommodate the student body if appropriate means are taken. This could at least serve during the winter months, while in the warmer months the assemblies might be held in the Great Court. The other important difficulty is that of having time for the assembly, but this should certainly be arrangeable. There is no time like the present—let us then devote our energy to anticipating the time when Technology will be "at home" on the campus.

AND THEY CALL IT FREEDOM!

NOT SO many years ago, theatre audiences gave way to decorous but delighted laughter whenever a vehement "damn" was heard on the stage. Now much stronger epithets are necessary to make such an impression on any but the veriest neophytes among theatre goers. That is called progress. We think that we have advanced toward the elusive quality of freedom because—as we tell ourselves—we have overcome the artificial inhibitions which led us to slight truth out of fear of transgressing moral codes. We think that we are approaching mental and moral emancipation to such a degree that we can listen to those unrestrained epithets with an artistic ear, and appreciate them, not for what they are but for their aid to art.

Let us not be so certain, though, that we are not merely fooling ourselves. It is far more likely that most people still enjoy profanity on the stage for the same reason that they enjoyed it years ago. Then they laughed because the word symbolized an escape from convention, and since in a successful play the emotions of the actors and of the audience are merged into one, the mental effect was the same as if the people who listened were themselves using the words. The same idea, though he does not know it, is in the mind of the small boy when he smokes a corn-silk cigarette behind the barn. He does not get any particular pleasure out of smoking it but, with the rest of us, he likes to stick out his tongue at rules and conventions.

We still like to emancipate ourselves through the mouths of actors and say through them the things we dare not, or think we should dare not, say for ourselves. The reason has remained the same for years, but it is taking ever stronger words to satisfy us.

As We Like It

OLD ENGLISH

Should we attain the age of eighty, we shall recall in moments of pleasant reflection, some of the plays and actors that struck home to us. Among these there is sure to be *Old English* as George Arliss completed and consummated it. Among these will be George Arliss adorned and aided by the excellency of *Old English*. The combination was near perfection, the impression lasting. Sylvanus Heythrop (George Arliss) and Joseph Pitlin (Ivan Simpson)—there are two old gentlemen for you, the one the very antithesis of the other but good friends unto the last of their days. The action begins with Sylvanus seated in the office receiving callers, stalling off creditors, refusing money to relations, and then meeting the stockholders. The latter he rides roughshod over and forces them to buy some ships. But enough, the play is to be seen and not narrated second-hand. Suffice it to say that it is Galsworthy.

Arliss has the lead, and his performance merits the high place. But the audience, time after time, broke into spontaneous applause for the splendid acting of Simpson. With the possible exception of Rosamond Lane, the widow of Sylvanus' natural son, the cast in its entirety was excellent and was fitted to the high quality they surrounded and interpreted. Perhaps the above role was not so well handled as the others. But what form and attraction! Compensations they were, so far as we were concerned. Usually when we feel enthusiastic we begin to doubt ourselves and fear that we have lost our sense of proportion. Not so in this case; *Old English* as it is at the Wilbur permits no doubt, no idea of the depreciation. It is consummate.

R. C. D.-J. R. K.

BWARE OF WIDOWS

"Widders, Sammy," remarked Mr. Weller, "are exceptions to every rule. I have heard how many ordinary women one widdier is equal to, in point of coming over you. I think it's five and twenty, but I don't rightly know whether it ain't any more." So quotes the programme from "The Pickwick Papers" and the play shows the rightness (?) of it, with Madge Kennedy playing the obstreperous "widdier" coming it over nine other folk in Owen Davis' "Beware of Widows," in that delightfully funny manner, naive, coy, tearful and witty, as the moment's needs demands.

The story—several guests on a houseboat, more house, less boat, the captain of which looks like a barge-man dressed for a wake, are disturbed in their amorous twittering by an accident near the dock, which precipitates the trouble-some widow into the action. Then war between the ladies! Finally feminism—in the widow—triumphs, rescuing the heroic doctor, a heart specialist of several kinds, from a drowning brought by the "widders" leaving the boat cut loose from its mooring only to drift onto a convenient mud bank.

The cast is good, really one dislikes pulling them to pieces. The doctor roars as most medicos do not, especially "lady heart" doctors. Blustering doctors catch few patients. Ruth Chadwick is played by Miss Miles as if she had a bit of experience at wooing dark pasts from her male acquaintances. A quite convincing moon-stricken cub is Donald McDonald. Paula Lee is convincing in her trapping of a second husband through affection, and an intriguing dinner gown.

But Madge Kennedy, there is but one, daintily clad, lives the role humanly, without an unnecessary gesture or word, sparkles throughout the evening's situations, acting as if she had written the book herself.

The audience chuckled, laughed, and even cried at the comedy. After tucking away the kerchief, they applauded. An enjoyable evening was had by all, 'n' this "feller's" goin' again!

ARTISTS AND MODELS

"Artist and Models" at the Majestic lives up to its advertising which says "The scenery came by freight—the costumes by radio" except, of course, that the company found tight's awaiting them at the city gates. As in first edition, Artists and Models number two presents a variety of comic skits, snappy dances, and excellent humor.

Fred Hillebrand, the gangling gentleman, furnishes most of the humor. He has lots of opportunity to show his stuff in such pieces as "There's Truth in China." It is the old story of the lie detector done over, but done over most cleverly and spicily. Dave Seed and Frank Gaby gather in any ha-ha's left over.

Ann Toddings, Grace Heyes, Lucita (Continued on Page 4)

Looking Backward

40 Years Ago This Week

The Technology football team beats Amherst with a score of 32-0. The Juniors are holding a heated debate this week on the subject: "Does marriage bring more happiness than suicide?" All those who visit the same girl week after week, show particular interest.

25 Years Ago This Week

Since last week when H. C. Moore was killed in the cane rush, sentiment in favor of the abolition of the annual cane rush has been growing steadily and several plans have been suggested to take its place. They will probably be discussed at the next meeting of the Institute Committee.

10 Years Ago This Week

Several hundred tickets for the Harvard cheering section of the Harvard-Yale game have been received. Those purchasing them are invited to the Harvard rally Friday night in order that they may be familiar with the cheers.

In its last meeting the Chemical Society discussed war chemistry considering particularly the developments brought forth by the present European War.

The last All-Technology picture before we move to Cambridge will be taken this week.

HARRIERS READY FOR I. C. A. A. A. MEET

PISTOL MEN WILL HAVE THREE TEAMS

Men who are interested in shooting have an excellent opportunity to practice as there will be three teams organized; an Engineer unit team, an O. T. C. team and a Pistol Club team. H. B. Cuthbertson '26, president of the Pistol Club announces that practice with .45 caliber automatics will be held Tuesdays, Wednesdays and Saturdays at the Commonwealth Armory range. Those wishing to shoot must sign up on the bulletin board in Building 10.

McClintock Favored to Capture First Place In Frosh Event Next Week

After Monday's success in the New England Intercollegiate both the Varsity and freshman cross country teams are on edge for the National games at New York next week. The yearling results exceeded the fondest hopes of Oscar Hedlund when they walked away with their event over such teams as Maine State and New Hampshire. The frosh have a great team this year and should prove a match for the crack Syracuse team.

Marvin Rick's running in the New England's means that at last the steeple chase star has rounded into form. He has been so busy this fall that he did not think himself capable of leading the six mile run, but his work on Monday has given him plenty of confidence. It was great to see him lengthen out his stride there at the five mile mark on the Franklin Park course. It was at that point that he began to work up from a position away into the rear to that of a real contender. He passed about five or six men in the next half mile as if they were standing still. At the finish he was running at top speed and apparently with plenty of fight still left in him.

McClintock in Shape

Bill Robney fought Fred Peaslee of New Hampshire too hard in the first two miles and so ruined his chances of being with the leaders at the tape. He put up a great fight though and will no doubt try all the harder at Van Cortland Park next Monday. Bill is the hardest worker over at the track house and a real captain.

If Norm McClintock should wear all the medals he wins at the long distance pastime at New York he would not have a possible chance of winning. He would be too weighted down. He took two solid gold medals home with him after the freshman race on Monday. Incidentally the freshman team received gold medals for their work in this race.

NATATORS TO HAVE INTERCLASS MEET

Prospects for a successful swimming season are very bright if early season indications can be taken seriously. There were about thirty candidates exercising their talents at the Cambridge "Y" Wednesday night and Coach Dean intimated that he was quite pleased with the showing up to this time.

Fundamentals are being stressed at this time and individual weaknesses are being brought out by the coaches and corrected. Several boards have been obtained for the purpose of drilling on leg movement and the mermen are taking enthusiastically to this idea.

An interclass meet is being planned for the natators about December 21 and should bring out the new potential stars besides providing some good competition for the regulars. At this time it looks as if either the Juniors or Sophomores would come out on top, with the Freshmen somewhat of an unknown quantity. Practice is being held at the Cambridge "Y" every Monday, Wednesday, and Friday nights from 5 to 6 o'clock.

'SNIQUE DEFEATS TECH IN HARD FOUGHT GAME

Outplayed but not outfought, outlucked but not outfumbled, the pigskin warriors of THE TECH went down to glorious defeat Wednesday afternoon to the tune of 12-0, before the smashing onslaught of Technique gridiron gladiators. The powerful combine of Faithful and Steinbrenner was more than THE TECH defense could hold back and with these men circling the ends, smashing off tackle and bucking the line for long gains, the scribes of the year book once more triumphed over their traditional rivals from the newsroom.

For the first time in many years old Prof. Prognosticator failed to pick a winner when Snique's dusky knights of the striped field, kicked over the dope bucket and whitewashed their

opponents. Not only was Prof. Prognosticator completely fooled but Kid Dopester, who is considered to be about the best forecaster in the ranks today, also took a licking when he prophesied an overwhelming victory for THE TECH.

The Tech Wins Toss

As Frank Merriwell would say, Wednesday afternoon dawned bright and cold but with ideal weather for the annual battle. When the time for the struggle drew near several airplanes were seen circling over Tech Field. At 3 P. M. promptly both teams with their respective stenographers advanced on the field with a do-or-die spirit in their every motion.

THE TECH won the toss and chose to kick off, the ball traveling to the 20 yard line where Woods, the Snique quarter, ran it back about 5 yards before he was tackled. On the next play there was a general mixup and after the players had been removed from the pile and sorted out the ball was in possession of THE TECH. After a series of fumbles, Woll punted to Wood who was tackled after a short gain.

Faithfull Makes Touchdown

On the next play Hank Steinbrenner with the ball safely tucked under his arm skirted around left end, swept by the secondary defense and with Jim Killian as a lone pursuer hot-footed it for THE TECH goal-line. After traveling about 10 yards Killian realizing that Steinbrenner would escape him, shifted into high, stepped on the gas and took after the flying Technician. He tackled him on the 5 yard line but Steinbrenner had passed the goal line before he struck the ground. Davier then failed to kick the goal and the score read Technique, 6, THE TECH 0.

Teams Dine at Louis'

After this long run both teams settled down to a more or less mediocre brand of football with Capt. Rhinehart of THE TECH and Ted Faithfull of Technique featuring on the offense. In the second quarter Technique started a drive down the field that resulted in the final score of the game. Getting possession of the ovoid on THE TECH'S 30 yard line, the Snique backs pounded and hammered, bucked the line and smashed off tackle, until Faithfull by a line plunge crossed the goal line for the second touchdown of the game.

BOXING MATERIAL IN SPLENDID FORM

Coach Rawson Has Candidates In All but 168 and 175 Pound Classes

Watching the boxing candidates go through their workouts every afternoon, it seems quite certain that Technology will possess a team that will do credit both to itself and Technology.

Coach Tommy Rawson is in the hangar daily putting the men through the paces necessary to qualify them as finished boxers. At present there are about 50 men exchanging punches regularly and it appears quite evident that both the Varsity and freshman teams will produce winning combinations. Both squads lack heavy material as neither has any candidates in the heavyweight classes. The season is still in its infancy and at the rate the squads are increasing, it is probable that the vacancies in the 175 pound and unlimited classes will be taken care of.

About fifty per cent of last year's team are back. These are Captain Epstein, Kwok, and Flynn. Captain Epstein will be unable to put on the gloves when the season begins as he is still recovering from the effects of a recent operation. He is at present assisting Coach Rawson in tutoring the new candidates. However, "Eppie" is keeping in rigorous training as he wishes to remain in the pink of condition and to be so when he enters the ring for the first time this season. He will take care of the 135 pound class. Kwok who boxed in the 115 pound class last year is making a strong bid for the 125. Flynn also seems quite certain in the 158. Of last year's frosh, there are Conroy and Peatfield, who at the present writing, predominate in the 145 and 115 pound classes respectively. Of the 168, and 175 pound classes, left by Ex-captain Kuhn and Trask respectively on graduation, it remains to be seen who will fill these vacancies. There is a big man named Marshall out. He is a transfer from McGill and has left a fine record behind him in Canadian rings. Unfortunately he is ineligible to compete this year but being only a Sophomore, he has two seasons ahead of him.

ENGINEER KICKERS ENCOUNTER CLARKE

Clark University will provide the opposition for the Technology soccer team on Tech Field tomorrow afternoon at 2:30 o'clock. After the win over Northeastern last week the Engineer ball pushers' stock went way over par and they should make a good showing against Clark tomorrow.

Last year the soccer team barely nosed out Clark by kicking a free try at goal, making the score 1 to 0. Captain Arana has kept his charges in form this week by playing Harvard in an informal game at the Stadium Wednesday night.

Follies Girl Is Feature Of Program At Smoker For Dormitory Men Tonight

Annual Affair Promises to Attract Large Attendance

Miss Jessie Alcova, formerly of the "Follies," and of George White's "Scandals," in a special song and dance act, will head the bill of entertainment planned for the Dormitory Smoker to be held this evening in the recreation hall of the Carr Fastener Company. According to the chairman of the Smoker committee, Miss Alcova is well known to Broadway audiences for the originality of her dancing, and has taken pains to produce a special act that will please college men to be present at the affair tonight. The "Ramona Five," specialists in jitter dancing, also feature the entertainment which will be offered. According to the committee, they will present the same act which has been pleasing cabaret audiences in Boston during the past few months.

Distribute Tickets This Morning
Law Deane, eccentric comedian, has been engaged to provide the comedy for the affair. Music will be furnished by a four piece orchestra. Refreshments consisting of sandwiches, cake and cider, will be served.

Tickets for the smoker will be distributed in the dormitory mail boxes early this morning, and it will be necessary to show a ticket to gain admission. It is desired to make the smoker strictly a dormitory affair. A large Technology banner, which will be given to the holder of a lucky number, the numbers being printed on the tickets of admission, is now on display in the dormitory office. Photographs of the entertainers are also on exhibition.

Members of the Dormitory Board will attend. Having expressed the desire to be allowed to have a good time together with the dorm men they have requested to be regarded as the audience and to be relieved from delivering speeches, as has been the custom in previous years. As a result, the evening will be given over to music and vaudeville entertainment.

O. B. Denison '11, secretary-treasurer of the Alumni Association, will also be present. He has promised to bring the music for "The Three Brass Balls" along with him. The Dormitory Superintendent, known to Dorm residents as "Mac," is trying hard to keep away but the committee promises to seduce him into attending the affair tonight.

The Carr Fastener Hall has been the scene of the annual dormitory smoker for the past two years. It is located directly behind the Institute building, entrance being made through an alley opening on Ames street.

HOLLIS

The stage of the late eighteenth century is reproduced for modern theatre-goers in "The School for Scandal," by Richard Brinsley Sheridan, now playing at the Hollis Theatre. The performance is being given by an all-star cast who are on tour with this revival of a play which has been popular for a hundred and fifty years.

O. P. Reggie and Miss May Collins as Sir Peter and Lady Teazle are particularly good, making their bickerings and reconciliations extremely amusing. Ian Hunter is a bluff, hearty Charles Surface; and James Dole as his brother makes a very effective "man of sentiment."

The stage effects are very simple, one basic set being rearranged to give the effect of the changing scenes. Between scenes, curtains are drawn for a moment while the house is in darkness, and a couple of new drops effect the change.

Considerable pains have been taken to make the costumes reproductions of those of Sheridan's time; and the many colored-suits and dresses, the knee breeches and silk stockings of the men and the ruffles and flounces of the women create a very picturesque atmosphere.

A limited number of this year's paper covered handbooks are available at the T. C. A. office for those who have not yet received them.

CATHOLIC CLUB

The Annual Informal Fall Dance of the Catholic Club will be held tonight in the Main Hall, Walker. "Dok" Eisenbourg and his Sinfonians will furnish the music. The tickets are \$2.00 a couple and may be secured from officers of the club.

ARTISTS AND MODELS

(Continued from Page 2)

Covers et al are the women in the case and give the case quite a "kick."

What the show is really outstanding in, however, is the scenery and the tableaux. There are a number of these latter, too many according to this reviewer, but all very well done. The scenery is beautiful throughout. Our revues vie with each other in the matter of color schemes and Artists and Models stand well to the front among them.

In one of the scenes Violet McKee and Tommy Healy lead the chorus with usual natural complexions. The lights change and we have the leads and chorus appear in perfect black-face make-up. This should interest our physicists.

All together we have an evening of all around good entertainment. It is worth the while of any one who needs cheering up. R. A. R.
